Find out if you're at risk for heart disease with a simple, non-invasive CT Heart Scan. The results from your CT Heart Scan will reveal your calcium score, or how much calcium is deposited in the arteries of your heart. The more calcium build-up, the higher your risk for developing heart disease.

Call Riverside Outpatient Scheduling at (815) 935-7531 to schedule your CT Heart Scan.

Schedule your CT Heart Scan if you are 35 years or older, have not been previously diagnosed with heart disease, do not have a pacemaker and have at least two of the following risk factors:

- Men over age 45
- Women over age 55
- Family history of heart disease
- Obesity
- High cholesterol
- Physical inactivity
- Diabetes
- High blood pressure

Call Riverside Outpatient Scheduling at (815) 935-7531 to schedule your CT Heart Scan.

CT Heart Scans are available in Coal City and Kankakee. For more information, visit riversidehealthcare.org/heart.
